

# Sprint 2 Report, Sustainability, The Sustainers, 2/23/15

## **Actions to stop doing**

- Stop being late to meetings because they slow down the rest of the team.
- To stop meeting so often with the IDEASS team because it is not productive or informative.

## **Actions to start doing**

- Continue communicating with each other about how the project will assimilate at the end.

## **Actions to keep doing**

- Continue to make good progress with our projectmake good progress with our

## **Work completed/not completed**

(not completed, still in progress)

- As a user, I want a working, visually appealing interface that grabs audience attention and incites the need to conserve energy.
- As a back end developer, I want the backend data to be complete so that I can present the data and stream it to the interface.
- As a back end developer, I want sufficient data and analysis so that I can develop a data structure for the front end.

In user story 3, tasks 1, 2, 3 are complete.

## **Work completion rate**

*This section should report the following: total number of user stories completed during the prior sprint. Total number of estimated ideal work hours completed during the prior sprint. Total number of days during the prior sprint. For the previous sprint, the user stories/day and ideal work hours/day figures should be reported. For sprints past the first sprint, this section should also provide the average user stories/day and average ideal work hours/day figures computed across all sprints to date. The final sprint burnup chart for the previous sprint should be available for viewing in the lab and an email of this chart sent to the TA/prof.*
