

# Sprint 3 Report

## Sustainability Energy Alert

### The Sustainers

3/09/15

#### **Actions to stop doing**

#### **Actions to start doing**

Start to combine everyones work into one big project.

#### **Actions to keep doing**

Communicating between us, so we could develop an integral product and well designed.

#### **Work completed/not completed**

(minimally functional, but still in progress)

- As a user, I want a working, visually appealing interface that grabs audience attention and incites the need to conserve energy.
- As a back end developer, I want the backend data to be complete so that I can present the data and stream it to the interface.
- As a back end developer, I want sufficient data and analysis so that I can develop a data structure for the front end.

User Story 3, tasks 1, 2, 3 are complete.

#### **Work completion rate**
